

Information Guide

Work less. Lift more.

What it is

Our homes are a part of us. They're even like a member of our family. So when they feel cluttered and chaotic, we often feel that way, too. This is where our attics come in to save the day.

There's just one problem. Attics require stairs or a ladder to access. How do you lift a family chest or your holiday decorations into your attic while climbing one of these? The short answer is: you don't. At least, not without risking serious injury to yourself or others.

Until now.

The Aladdin Storage Lift is a revolutionary home storage system that bridges the attic gap. At just the turn of a key, you can safely lift loads as heavy as 500 lbs into your attic at just the turn of a key. With no loading height restrictions, you can quickly lift taller items like holiday trees and furniture, too!

We make decluttering fast, easy, and enjoyable.

How it Works

We like to make decluttering simpler, don't you? That's why we took great care to make operating an Aladdin Storage Lift easy and hassle-free. Here's how it works:

1. Lower the lift

Using the wall switch, turn the key to begin lowering the storage platform to the floor for easy loading.

2. Load items

Load items you'd like to store onto the storage platform. Don't worry. The Aladdin Storage Lift is designed to carry heavy loads so you can fit multiple items on each lift load and save time!

3. Raise the lift

When all items are stored securely on the storage platform, return to the wall switch and turn the key to begin raising the loading platform back into the ceiling.

4. Add/remove items

Access your attic entry and add or remove items from the platform, as needed. That's it!

Patrick A.
Aladdin Storage Lift Customer

I'm able to put more packages, more boxes, more Christmas up into my attic.

I feel very confident with everything I'm putting up there in my attic will not be damaged

Michael
Aladdin Storage Lift Customer

It's just saving me. I'm getting so much stuff up there and out of my way without having to store it some place

I've put about 10 to 15 loads up here already and I only installed this on Saturday.
